

[V7] ISSUE: xhost command not found error when running the RunConfigurator.sh script file

Article ID: 5090

Reviewed: 2015-12-28

Product Version:

AhsayOBM: 7.3.2.0 to 7.x

OS: Linux

ATTENTION 1st January, 2022: v7 officially End-of-Life [[details](#)]

Problem Description

When running the RunConfigurator.sh script file on a Linux computer, the following error message is received:

```
RunConfigurator.sh: line 35: xhost: command not found
Startup Ahsay Online Backup Manager ...
Config file found
```

Login Menu

- (1). Login
- (2). Change Network Settings
- (3). Forgot Password
- (4). Quit

Your Choice:

Note:

Configurator works properly even with the above error message.

Cause

This is a known issue with AhsayOBM 7.3.2.0 - 7.5.0.0.

Resolution

You can safely ignore the 'line 35: xhost: command not found' error message, Configurator is started correctly even with the mentioned error message.

To prevent the error message from displaying again, patch the AhsayOBM application to version 7.7.0.0 or above. The instructions can be found by [Clicking Here](#).

Keywords

xhost, command, linux, nix, gui
