

[V7] ISSUE: In-file Delta default to Differential for new backup set created with AhsayOBM / AhsayACB version 6 connected to AhsayCBS version 7

Article ID: 5093

Reviewed: 2015-12-30

Product Version:

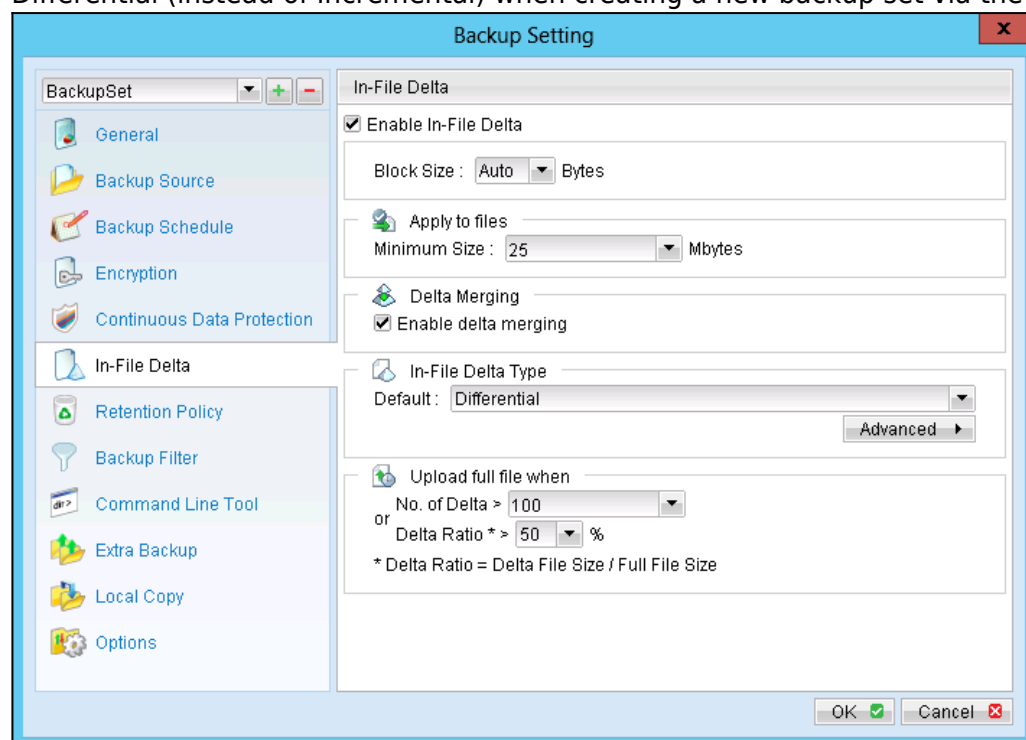

AhsayCBS: 7.3.2.0 to 7.x

OS: All platforms

ATTENTION 1st January, 2022: v7 officially End-of-Life [[details](#)]

Problem Description

After upgrading AhsayOBS to AhsayCBS version 7.3.2.0 - 7.5.0.0, the In-file Delta setting is default to Differential (instead of Incremental) when creating a new backup set via the client user interface:

Note:

This issue will only affect AhsayOBM / ACB client applications that remain on version 6 after AhsayOBS was upgraded to AhsayCBS version 7.3.2.0 - 7.5.0.0.

Cause

This is a known issue with AhsayCBS version 7.3.2.0 - 7.5.0.0.

Resolution

To resolve the issue, patch the AhsayCBS application to version 7.7.0.0 or above. The instructions can be found by [Clicking Here](#)

Alternatively, configure the In-file Delta setting manually, when creating a new backup set on AhsayOBM / ACB version 6.

The following is the default In-file Delta setting of a version 6 backup set:

- Enable In-File Delta: Enable
- Block Size: Auto
- Apply to files: 25 Mbytes
- Delta Merging: Disable *
- In-File Delta Type: Incremental
- Upload full file when No. of Delta: > 100
- Upload full file when Delta Ratio: > 50%

* Delta Merge feature is not supported by AhsayCBS version 7.3.2.0 or above.

Keywords

migrate, upgrade, infile, in-file, delta, del, default
