

[V7] ISSUE: Backup data on Single Storage Destination is not restorable after converting destination into part of a Destination Pool

Article ID: 5143

Reviewed: 2016-02-07

Product Version:

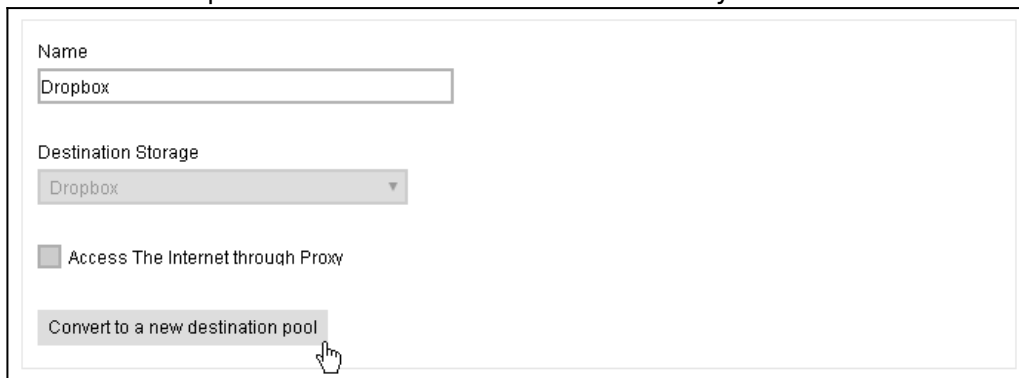

AhsayCBS: Pre-7.7.0.0

OS: All platforms

ATTENTION 1st January, 2022: v7 officially End-of-Life [[details](#)]

Problem Description

Data became unrestorable, if the single storage destination (containing the backup data), was converted into part of a Destination Pool via the AhsayCBS console:

A screenshot of the AhsayCBS console interface. It shows a form with the following elements: a 'Name' field containing 'Dropbox', a 'Destination Storage' dropdown menu also set to 'Dropbox', a checkbox labeled 'Access The Internet through Proxy' which is unchecked, and a button labeled 'Convert to a new destination pool'. A mouse cursor is pointing at the button.

When performing a restore, the following error message is received in the [Restore Job Log](#):

```
[YYYY/MM/DD hh:mm:ss] [info] error processing stream: com.ahsay.cloudbacko.bs: last block incomplete in decryption
```

```
[YYYY/MM/DD hh:mm:ss] [info] [CloudFileSystem.getInputStream] Failed to obtain inputstream for '[BackupFile][ClientPath=directory\path...]
```

Note:

This issue will not affect single storage destination that was converted via the AhsayOBM / ACB client interface. This issue will also not affect Predefined Destination.

Cause

This is a known issue with AhsayCBS version pre-7.7.0.0.

Resolution

Data on the converted destination (converted with AhsayCBS version pre-7.7.0.0) are no longer recoverable.

To prevent this issue from occurring again in the future, patch the AhsayCBS server application to version 7.7.0.0 or above. The instructions can be found by [Clicking Here](#).

Keywords

restore, fail, unrestorable, un-restorable, pool, destination, convert, conversion
