Description

This article contains instruction on how to add additional user storage (i.e. User Home) for AhsayCBS.

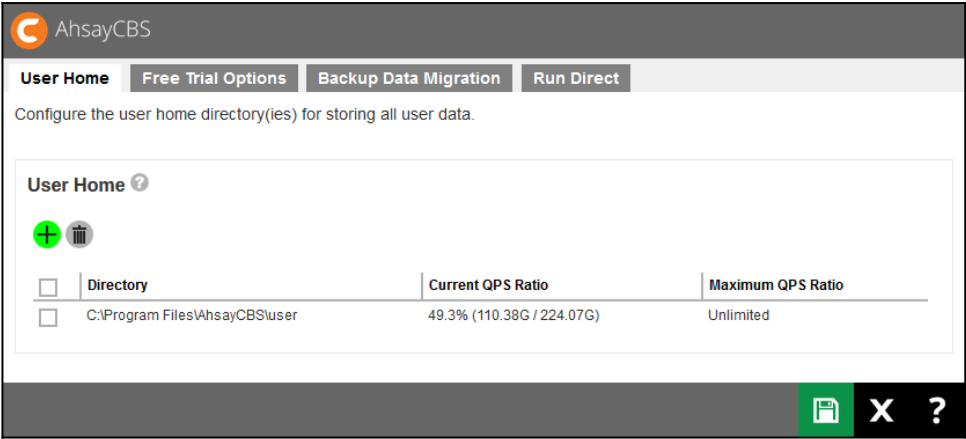

Steps

To add more storage for user backup data on AhsayCBS, you can install additional hard disk(s) (or connect to a network drive), then add the new directory / UNC path of the new location to the user home setting under the AhsayCBS web console.

1. Login to the AhsayCBS web console.
2. Select **Basic** under **Backup / Restore** .

3. Select the **User Home** tab.
4. Create a new User Home by clicking **Create** (circular + button), under **User Home** .

5. Enter the directory / UNC path to the new storage location under **Home Directory** .

Maximum QPS Ratio

Unlimited

▼

Note : For User Home set to a network drive, it is recommended to enter an UNC path (e.g. \\hostname\shared_path) instead of a mapped drive letter.

Enable the **Password protected network drive** option, if the new User Home is set to a network drive. Enter the **Login Name** and **Password** of a user with sufficient permission to access the network storage, to allow AhsayCBS access.

6. Modify the **Maximum QPS Ratio** setting if necessary, then click **Add** .
7. Click **Save** to save the changes.
