Article ID: 8026

Reviewed: 14/10/2019

Product Version:

AhsayUBS: 8.1 or above

Description

How to install the latest patch set for AhsayUBS?

Steps

This document contains the information of how to install the latest patch set for AhsayUBS.

Table of Contents:

- [How to install the latest stable patch release for AhsayUBS](#)
- [How to auto update all AhsayOBM / ACB client agents](#)

Important:

- Although the branding, SSL cert, and other configuration settings of your existing AhsayCBS server will be carried over after the upgrade. The AhsayOBM / ACB client installers will need to be rebuilt before they are updated to the latest release version. Therefore, it is recommend that the auto upgrade (AUA) feature is disabled for all backup users before starting the AhsayCBS upgrade process. Please refer to our [AhsayCBS Administrator's Guide](#) for more details on branding.
- When upgrading from an older release, for example AhsayUBS version 2.27.0.0 (6.27.0.0), before proceeding with the upgrade, please read through [Ahsay Backup Software Upgrade Guide](#).

How to install the latest stable patch release for AhsayUBS:

1. Download the following patch / hotfix file:
