

[V8] ISSUE: AhsayCBS services on Linux are not automatically starting up after a server reboot (AhsayCBS installation on Linux)

Article ID: 8084

Reviewed: 2020-08-07

Product Version:

AhsayCBS: 8.3.2.11 to 8.x

OS: Linux

Problem Description

After installation AhsayCBS on a newer versions of the following Linux distributions, for example, the CentOS 8, Red Hat Enterprise 8, or Ubuntu 20.04 LTS. After the server is rebooted or shutdown / started, both the AhsayCBS and NFS services are not automatically started up.

The two services must be manually started with the following scripts:

- AhsayCBS service - /usr/local/cbs/bin/startup.sh
- NFS service - /usr/local/cbs/nfs/bin/startup.sh

Cause

This issue is related to a problem with the AhsayCBS installation script and the Linux systemd utility (systemctl).

Resolution

To workaround this issue, it is recommended to perform the following steps:

1. Login to the Linux server as root.
2. Run the following commands:

```
>systemctl enable cbs  
and
```

```
>systemctl enable cbsnfs
```

3. Reboot the server afterward.

4. After the server is restarted, you can use the following commands to confirm if the services are running properly.

```
# ps -ef| grep java
