

AhsayCBS User Home

User Home in [AhsayCBS](#) is for storing all users' profiles. Backup data can also be stored under here if users choose to backup to AhsayCBS, or a Predefined Destination bound to AhsayCBS (for branding purpose). You can add as many local drives or mapped network drives (e.g. NAS storage) as User Home for storing users' backup data. You can move users across different User Homes easily with just a click.
