[V7] ISSUE: Replication traffic limit does not work when set to 0 Kb/s (data are still replicated)

Article ID: 5134
Reviewed: 2016-02-05

**Product Version:**
AhsayCBS: Pre-7.7.0.0
OS: All platforms

ATTENTION 1st January, 2022: v7 officially End-of-Life [details]

Problem Description

Data are being replicated during time period with traffic limit set to 0 Kb/s.

For example, traffic limit is set for Monday 09:00 to 18:00 to 0 Kb/s:

Cause

This is a known issue with AhsayCBS version pre-7.7.0.0.

Resolution

To resolve the issue, patch the AhsayCBS application to version 7.7.0.0 or above. The instructions can be found by Clicking Here.

Keywords ========== ISSUE: Password complexity requirement missing after upgrading to AhsayCBS (User with password containing less than 6 characters can be created)

Article ID: 5135
**Reviewed:** 05/02/2016

Product Version:
AhsayCBS: Pre-7.7.0.0
OS: All platforms

Problem Description

After upgrading AhsayOBS from version 6 to AhsayCBS version 7.3.2.0 - 7.5.0.6, backup account with password containing less than 6 characters can be created in the AhsayCBS console.

Note: In previous version of AhsayOBS, a backup user's password must be at least 6 characters in length. The following error message is displayed if the requirement was not met when creating a backup account:

Cause

This is a known issue with AhsayCBS version pre-7.7.0.0.

By default, the password complexity requirement is not enabled for the [Default settings] policy group (policy group which applies to all backup accounts).

Resolution

To enable the password complexity requirement for all backup accounts:

1. Login to the AhsayCBS console, select [Backup / Restore] > [Users, Groups & Policies]:

Users, Groups & Policies

2. Under the [Policy Group] tab, select [Default settings].

| Backup User | User Group | **Policy Group** | Windows Active Directory Integration |

Policy Group is designed to simplify administration and to reduce the effort required for managing groups of backup users, e.g. security settings and backup set settings. It allows administrator to tailor features and services for different user groups.

Manage Policy Group ⓘ

➕ 🗑 📋

	Name	Owner
☐	Default settings	--
☐	Policy Group - Read Only - Backup User-ACB-v6	--
☐	Policy Group - Read Only - Backup User-OBM-v6	--

3. Enable the [Password] switch under [User Settings].

4. Modify the [Complexity Requirements] as required:

Password

Password Age
○ Never expire
⦿ 90 ∨ days

☑ Enforce password history (30 passwords remembered)

Complexity Requirements
⦿ Default
☑ Numbers (0-9)   ☑ Uppercase   ☑ Lowercase   ☑ Minimum length 6

5. Save afterward.
