

[V7] ISSUE: Backup Source cannot include the location for storing the system backup (MS Windows System backup)

Article ID: 5310

Reviewed: 2018-02-27

Product Version:

AhsayACB / AhsayOBM: 7.3.0.0 to 7.x

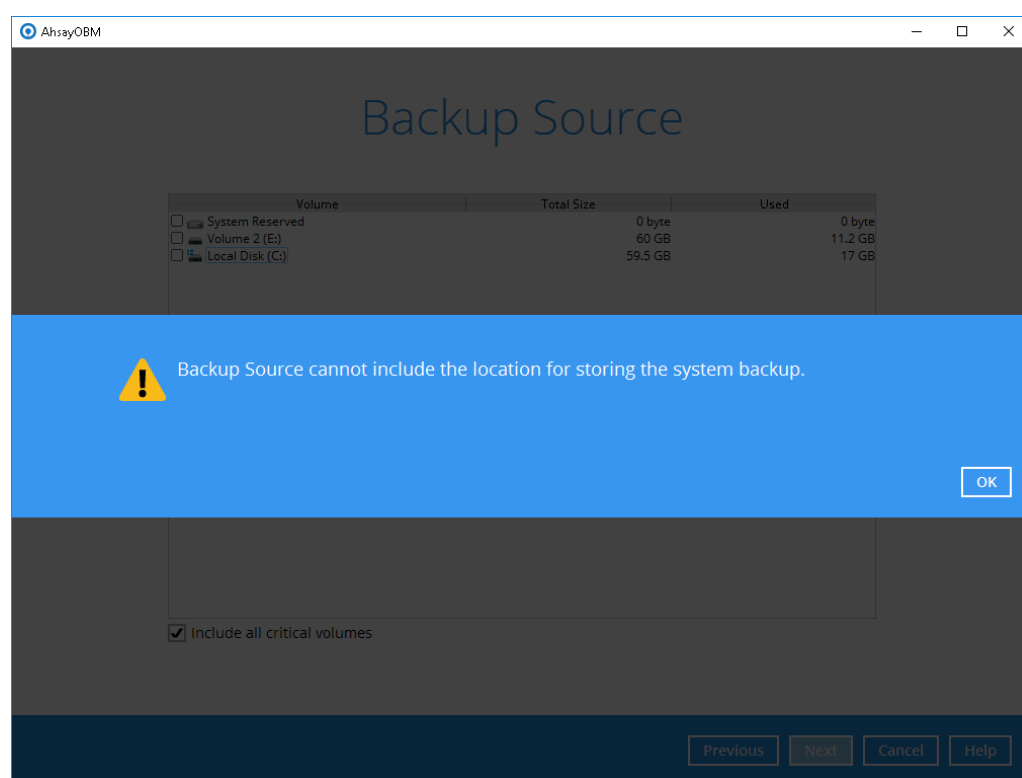

OS: Windows Vista, 7, 8, 8.1, 10

ATTENTION 1st January, 2022: v7 officially End-of-Life [[details](#)]

Problem Description

When creating a MS Windows System backup set, the following error message is displayed on the backup client interface:

Backup Source cannot include the location for storing the system backup

Cause

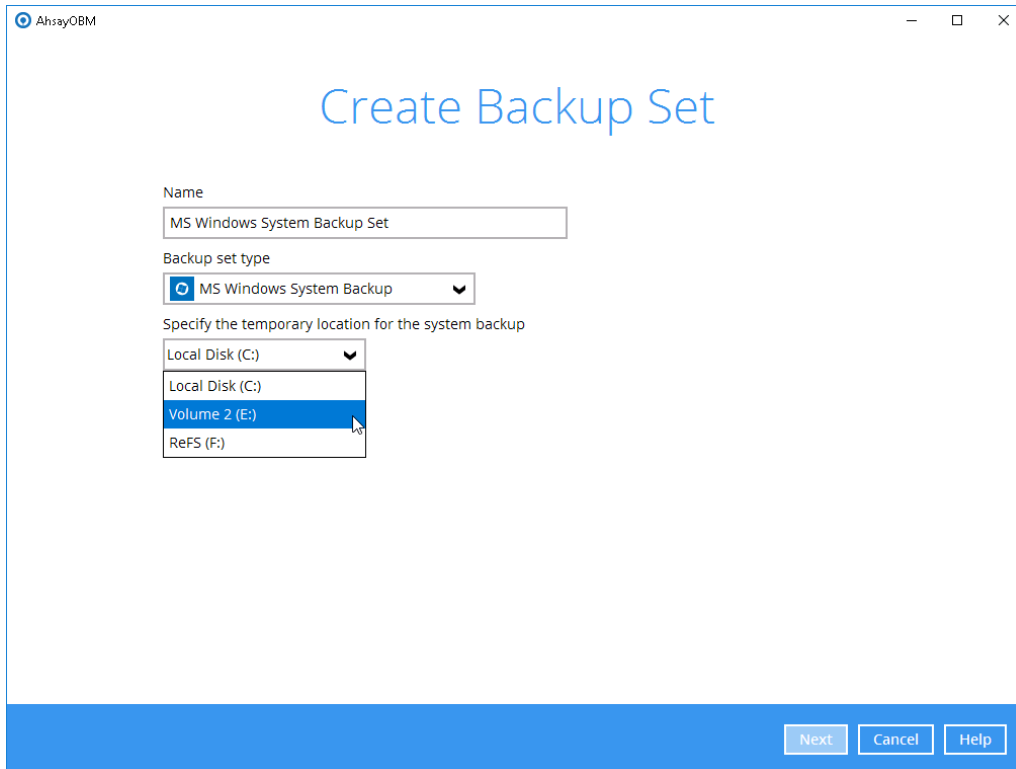

The message suggests the temporary storage location is invalid.

It is a requirement of Windows Backup Feature (WBAdmin.exe) that the volume selected for storage

must be different than the volume selected for backup. In other words, you cannot configure a backup of C:\ and have the temporary storage location configured to C:\ as well.

Resolution

To resolve the issue, select another volume for the temporary location of the system backup.

AhsayOBM

Create Backup Set

Name
MS Windows System Backup Set

Backup set type
MS Windows System Backup

Specify the temporary location for the system backup
Local Disk (C:)
Local Disk (C:)
Volume 2 (E:)
ReFS (F:)
