**Article ID:** 5354

**Reviewed:** 2018-09-27

**Product Version:**

AhsayCBS: 7.3.0.0 to 7.x

OS: All platforms

**ATTENTION** 1st January, 2022: v7 officially End-of-Life [[details](#)]

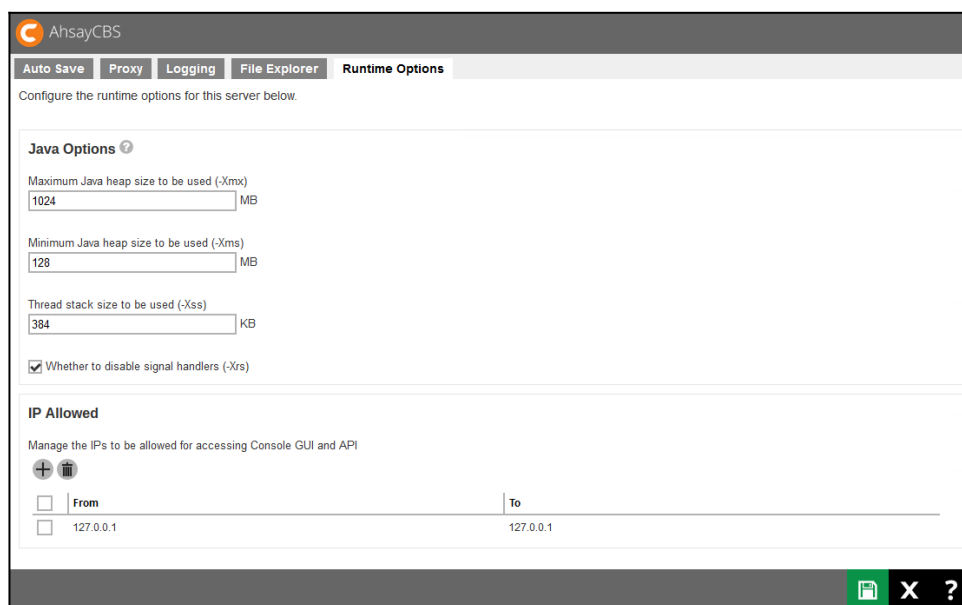

## Description

This article contains instructions on how to set up IP filter to restrict access to your AhsayCBS system and user web console.

## Contents

To setup an IP filter to restrict access to your AhsayCBS system and user web console, you can do so by logging into the AhsayCBS system web console:

1. Select System Settings > Advanced > Runtime Options > IP Allowed

2. Click on the existing IP Allowed range to edit the existing filter, or click Create to create a new IP Allowed range.
3. Enter the From and To IP addresses, then click OK

#### 4. Click Save.

Once the IP filter is configured and saved, the following error will be displayed, when a system or backup user attempts to login to the AhsayCBS system or user web console from an IP address outside of the allowed range:
