

FAQ: Is there any silent installation script for the AhsayOBM and AhsayACB client application?

Article ID: 8036

Reviewed: 21/03/2019

Product Version:

AhsayOBM / AhsayACB: 8.1 or above

OS: Windows

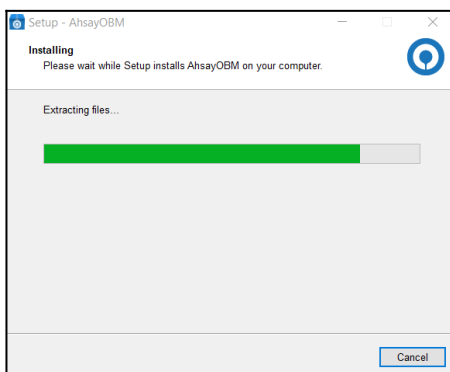

Description

This document contains instruction on how to silently install AhsayOBM / ACB on Windows platform (e.g. client application installation without user interaction).

AhsayOBM / ACB supports two silent installation options on Windows platform.

- **Silent mode**

When using the "Silent" install mode, the installation progress is displayed on screen but no user interaction is required.

- **Very Silent mode**

When using the "Very Silent" mode, no visual feedback is displayed on screen.

Steps

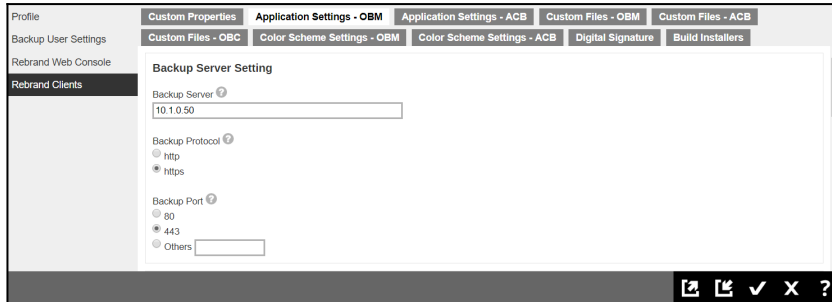

To perform a silent or very silent install, refer to the following steps:

Preparation:

- The AhsayOBM / ACB installers have been branded to include:
 - Backup server URL
 - Backup server connection protocol

- Backup server port setting
- Owner ID

For example, if the backup server URL is 10.1.0.50, protocol is https, the port is 443 and the owner ID is 0.

The AhsayOBM / ACB installer must be renamed according to the backup server settings, where:

- For AhsayOBM - obm-win-{port number}-{backup server URL}-{protocol}-{owner id}O.exe
- For AhsayACB - acb-win-{port number}-{backup server URL}-{protocol}-{owner id}O.exe

For example:

obm-win-443-10.1.0.50-https-00.exe
acb-win-443-10.1.0.50-https-00.exe

- The default language selection on AhsayOBM / ACB will be English.
- Windows UAC (User Account Control) is disabled on the Window computer where AhsayOBM / ACB will be installed.
- The option to install the client application for "Me Only" or "Anyone who uses this computer" can be controlled by the parameters /TASKS="meOnly" or /TASKS="EveryOne" (example to be shown next):
