

Backup / Restore Logs

Through AhsayCBS Backup / Restore Logs section, the administrator can find all the backup and restore logs of all users. Aside from this, Restore Drill Jobs, Backup Errors, Backup Set Log and Activities Log may also be viewed.

The list may be filtered by Backup Job, Job Status, Run on, User Group and Date.

Backup Jobs

By default, all backup jobs of all backup users that ran during the day will be listed. But other backup jobs can be viewed by using the filters.

Restored Jobs

By default, all restored jobs of all backup users that ran during the day will be listed. But other restored jobs can be viewed by using the filters.

Restore Drill Jobs

By default, all restore drill jobs of all backup users that ran during the day will be listed. But other restore drill jobs can be viewed by using the filters.

Backup Errors

By default, all backup errors of all backup users that were encountered during the day will be listed. But other backup errors can be viewed by using the filters.

Backup Set Log

All backup set log of all backup users will be listed.

Activities Log

By default, all the system logs of the AhsayCBS server for the day will be listed. But other system logs can be viewed by using the filters.
