

# Replication Logs

Through AhsayCBS Replication Logs section, administrator can find all the replication logs of all backup sets.

Filters are provided to locate the related backup jobs by Type of replication job, and Period.

---

## Replication Sending

By default, lists all the logs of sending job from the AhsayCBS server to the corresponding receiver for the day. But other sending logs may be viewed by using the filters.

---

## Replication Receiving

By default, lists all the logs of the selected receiver for the day. But other receiving logs may be viewed by using the filters.

---

## Activities Log

By default, lists all the replication activity logs for the day. But other replication activity logs may be viewed by using the filters.
