ATTENTION 1st January, 2022: v7 officially End-of-Life [[details](#)]

Problem Description:

When creating a VMware Workstation backup set no guest virtual machines are shown in the AhsayOBM backup source.

Even though the guest virtual machines are available in the VMware Workstation UI.

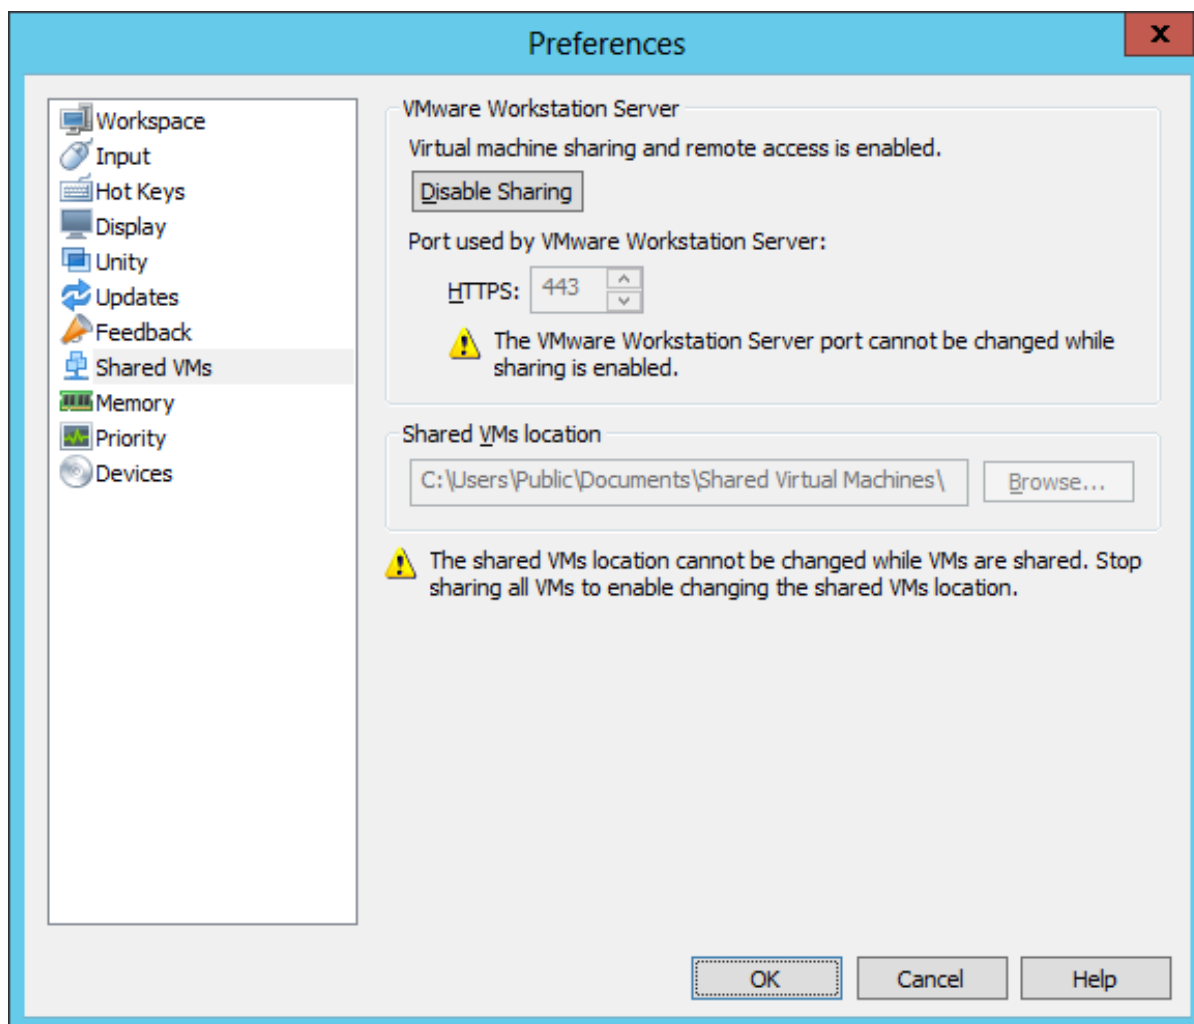

Cause:

This is a VMware Workstation configuration issue, the virtual machine sharing and remote access setting have not been enabled.

Resolution:

On the VMware Workstation UI:

1. Go to [Edit]>[Preferences]>[Shared VMs].
2. Click on [Enable Sharing] and then [OK] to confirm.

Keywords:

VMware Workstation, virtual machine sharing, backup source, VM, configuration
